

# Using an Xbox or Playstation for home learning:

## Step 1: Get connected

Both consoles are simple.

For the Xbox, press the Xbox button on the controller to open the guide, and then select “My games & apps”. Here, you need to find Microsoft’s internet browser Microsoft Edge.

The PS4’s access is similar. From the PS4 home screen, scroll to the library. Then, click on applications. If you scroll down the apps you’ll see a “www” sign circled by small dots. Click on that, and you're online.

Check your parental controls are on the right setting for your child.

Use the links on your timetable to access your daily lessons!

Both consoles can use a low-cost keyboard and mouse for web browsing – connect these through wireless bluetooth or USB.
